

TAKE THE WORRY OUT OF LEAVING YOUR HOME THIS WINTER.

*Monitoring costs just \$15.99/month and is prepaid at \$204.35/year which includes taxes.

Freeze-up Protection Starting at only \$99

What Will You Come Home To?

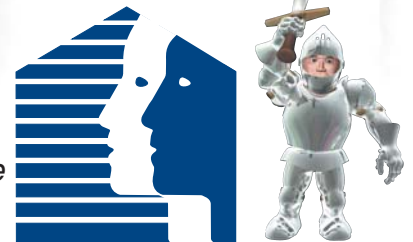

With freeze-up protection, low temperature sensors detect furnace failures before damage can occur.

The monitor simply plugs into a phone jack and outlet. It includes a 12-hour back-up battery in the event of a power outage. Cellular telephone options are also available.

1. The monitor is set at 45°.
2. If your home's temperature drops below 45°, the security system calls our response center.
3. The response center then calls your designated contact to alert them so they can take appropriate action to prevent freeze-up damage.

(Your contacts may include a heating company, neighbor, friends, relatives or you can be the sole contact.)

People's SECURITY COMPANY®
Always on Guard.®

Stop into our office at Crow Wing Power headquarters on Hwy 371 N, Brainerd, or call for more information.
